## 'UAVs & UGVs' cluster

# Robotics serving Land Security and Defence Operational

In order to limit human losses, robotics serves Land Security and Defence users, for safe and elaborated operations.

Eurosatory 2012 gives the opportunity to Unmanned Aerial Systems and Robots manufacturers to promote their products in a specific area. Beside a cluster where UAS and Robots exhibitors are all together gathered, use a 400m<sup>2</sup> arena to present in live your systems and robots. This arena will be equipped with obstacles built according to each company specifications to highlight mobility, handling, and exploring capabilities of your robots. Depending on the number of registered rotary wings (UAVs), a flight cage could be settled up. UVS International, the most important and well-known European association in the field will be present.
