V-SCOP

Telescopic towing triangle

2021/
535

A HIGH-END FINISH

The V-SCOP, designed by the forging specialists in the POMMIER factory based in Neufmanil, is coated by cathoporesis with a specially-treated corrosion-proof finish. The product can be painted, on request, according to the intended use.

HIGH PERFORMANCE

With a total optimised weight of 80 kg, the V-SCOP is easy to install and easy to use. It is delivered in three parts (assembly required). Its telescopic arms are adjustable in length (from 1473 to 2344 mm) by inserting locking pins, and are capable of pulling total loads of up to 35 tonnes.

A PRODUCT DEDICATED TO MILITARY APPLICATIONS

The V-SCOP complies with the STANAG 4101 & 4478 standards concerning the recovery and towing of military vehicles. Designed primarily for armed forces, it is the only towing triangle in its category currently available on the market that is adjustable in length, allowing it to be adapted to any type of military vehicle.
