

META OPERATOR

Empower Your Operational Success

The meta-operator, the privileged gateway to the New Space

In the dynamic context of the **New Space**, Telespazio France's meta-operator **revolutionizes access to spatial data**. Within this constantly evolving ecosystem, offering a diversity of space missions and introducing new types of data at reduced costs, our meta-operator proposes an **innovative approach**. By redefining the operational approach, it simplifies the selection and access to spatial data through an intuitive computer tool and a user-friendly portal. Thus, it allows focusing exclusively on tasks with higher added value, **ensuring maximum use and exploitation of information**, at all levels: strategic, operational, and tactical.

Operational assistance addressing complexity

The optimal exploitation of the New Space translates into the **varied use of new data**, requiring a meticulous consideration of the specificities of each mission.

Sensor technical watch

Guidance for sensor selection

Integration into systems

Data fusion

The commercial meta-operator: a trusted partner

To meet these challenges, the concept of a trusted meta-operator takes shape with Telespazio France

Agnosticism

Enhanced Reactivity

Consolidated Expertise

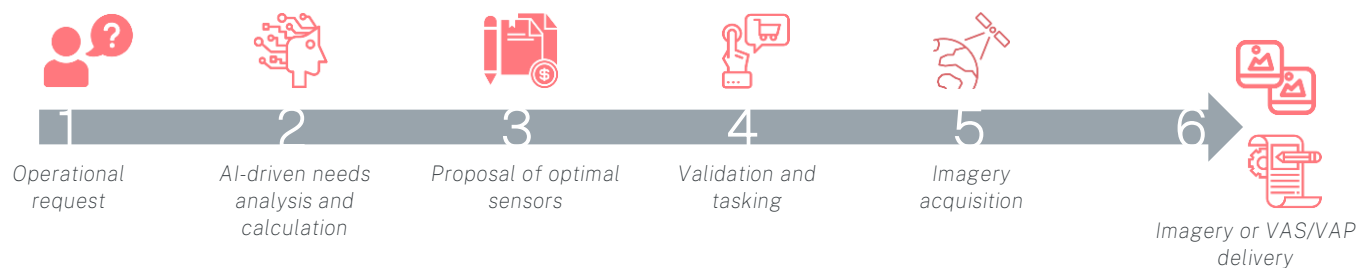

User-friendly & simplicity

Telespazio France, the trusted partner

To address these challenges, Telespazio France offers an **innovative solution**, the trusted meta-operator, asserting its role as a **reliable and independent partner** in the face of operational challenges. This approach **simplifies access to a multitude of spatial data** while eliminating obstacles related to operational complexity, allowing the user to fully concentrate on exploiting the results. The primary objective of this solution is to establish **informational superiority**, ensuring a crucial operational advantage in missions focused on "Knowledge and Anticipation".

● OPTIMAL ORCHESTRATION

- ▶ Simplifying the formulation of operational needs, our user-friendly and intuitive interface **streamlines the sensor selection process** by automating the choice of the best sensor. Based on predefined criteria, this automation eliminates the challenges associated with finding the ideal sensor.
- ▶ Through our interconnected solution, we ensure **seamless coordination** with suppliers and satellite mission centers, guaranteeing a swift and efficient supply of information.

● TRUSTED PARTNERSHIP

- ▶ Through our **exclusive distribution agreements**, we guarantee **full access** to archives and schedules, establishing as a **preferred partner status**. We provide a comprehensive range of satellite data while ensuring continuous sensor technology monitoring for unparalleled visibility.
- ▶ With proven expertise in geoinformation and satellite systems, Telespazio France positions itself as the **ideal partner** to address the specific challenges of the defense sector.
